In no event will the State of Alaska's liability to the Requestor or anyone else exceed the fee paid for the electronic service or product.
website: dggs.alaska.gov

DGGS conducts baseline assessments of flooding and erosion in collaboration with Alaska communities. Erosion and flood monitoring equipment were installed at Kotlik, Alaska in June of 2017 by DGGS, the Native Village of Bill Moore's Slough, and the Alaska Institute for Justice. Site equipment including erosion monitoring stakes, a time-lapse camera, and water level flood staff were surveyed using GNSS-GPS and are shown in this map.

This work was funded through the Alaska Institute for Justice and in-part by the State of Alaska.
